Troubleshooting

With rapid advancement in technology, IT has become an integral part of every business. Whether you own a small or a mid-sized business, you face the same day to day challenges with technology. While larger companies can afford to hire a dedicated staff of IT professionals, the expense cannot be justified for smaller businesses and start-up companies.

TEKNOSENSE is a leading provider of IT and network services for small to mid-sized businesses. Our services include server installation, network configuration and security, business process automation, network and operating system troubleshooting and on demand IT services...

Investment in Technology

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

Technology is a tool without which you cannot run your business effectively and is required to gain a competitive edge. Your investment in technology requires a thorough analysis of your current business processes and the benefits you are expecting to gain with technology. Whether you are a startup business or a fully established business entity, TeknoSense is the trusted resource that can help you in every aspect of your IT related decisions.

We work with you as a trusted partner and our success depends upon our customers' success. TeknoSense has been helping its customers in automating business processes and simplifying information technology using our industry proven methods and skills. We make your technological investment worth every penny and our motive is to keep your IT problems at a minimum by proactively monitoring your systems and resources.

NETWORK SECURITY

Network security and intrusion prevention has become the first priority for most businesses. TeknoSense has been helping clients implement firewalls and edge devices to protect business data and resources from internet attacks and unauthorized access.

flexible solutions for your business needs

NETWORK SOLUTIONS

For small businesses, without dedicated IT staff, network problems are a disaster effecting business productivity significantly. Issues related to your LAN and WAN networks can become increasingly difficult to troubleshoot without expert's help. Our experienced network engineers can effectively troubleshoot and resolve any network issues very quickly.

SERVER SOLUTIONS

Whether you own a single server or a bunch of them, or you are looking for Microsoft based server solutions, TeknoSense can help you with any server related questions or issues. As a Microsoft certified Small Business Specialist, we excel at implementing Microsoft server solutions and our support team can answer any questions related to your Microsoft based products. We are registered Microsoft partner and work directly with Microsoft to resolve our customers' server and software problems. We can install and configure email and collaborations solutions such as MS Exchange, SharePoint, CRM and other type of servers.

TEKNOSENSE IS A LEADING PROVIDER OF TOTAL END TO END IT SOLUTIONS.

REMOTE ACCESS SOLUTIONS

Technology has revolutionized the way businesses and employees connect together. It has become significantly important for employees to be connected to business resources all the time even when they are away from work. This is required not only to increase productivity but also to gain a competitive edge in this ever changing business market. We help our customers implement remote access solutions and provide following services.

- Secure Site to Site VPN Access
- Microsoft Terminal Server Access.
- Terminal Server Gateway Access to internal resources
- Remote Desktop Solutions.
- Dial up VPN Access
- Remote Office Connectivity Solutions
- FTP Server Solutions

COMPUTER SUPPORT

Small businesses rely upon us for any kind of workstation and server related issues. Whether you need technical support, software installation, operating system configuration, or any kind of server related questions, TeknoSense is always there to server you.

TROUBLESHOOTING

TeknoSense also provides on-demand IT services to its customers. Our customers call us to troubleshoot their day to day IT problems and our engineers excel at troubleshooting any kind of server, network, VPN and other Information Technology issues.
